

## INSULATION AND THERMAL PROTECTION

**THERMAL PROTECTIONS** are insulating products that serve to thermally and/or acoustically insulate any object. They are studied and customized according to the customer's needs, the design through CAD systems and the production with numerically controlled cutting machines and industrial sewing machines, allow to optimize the production times and to create the most complex shapes and guarantee the qualitative continuity of the product. **TUBI FLESSIBILI srl**, a company certified **EN ISO 9001:2008**, **OHSAS 18001:2007**, **EN ISO10014:2007**, has highly qualified personnel for the installation and assembly of the covers.

### EXAMPLES OF FABRICS USED:

- Polyester/PVC light or heavy fabric
- Silica vermiculite fabric
- Polyester/PVC fabric electrically conductive
- Glass/aluminum fabric
- Glass/PTFE fabric electrically conductive and non
- Glass/silicone grey or red fabric
- Silica fabric

### EXAMPLES OF SEWING THREADS USED:

- Polyester sewing thread
- Polypropylene sewing thread
- PTFE sewing thread
- Kevlar® sewing thread
- Kevlar®/INOX316 sewing thread
- Glass felt
